# Many ambitious men and women live only half a life—and don't know it

No person whose nerves are continually irritated, whose appetite and digestion are disturbed, or who doesn't sleep well has more than half his normal chance for success in life. For weakness, debility, anemia and general lack of tone are a serious handicap to anybody.

Those who drink tea or coffee are often sufferers from these conditions. Tea and coffee contain caffeine, a substance which has a decided stimulant action on the nerves.

Each cup of strong coffee contains about as large a dose of caffeine as your doctor would ordinarily give to a very sick

You can readily see that the effect of giving this stimulant regularly to a well person might finally have a tendency to make him sick.

If you want to avoid a very common cause of irritation and enjoy restful sleep, good digestion, and the feeling of vigor and robust endurance that comes to healthy, normal people, quit tea and coffee, and drink Postum, instead. It is a rich, coffeelike cereal beverage-perfectly

Order Postum from your grocer today. Drink this fragrant, aromatic beverage and see how much better you'll feel-able to do more without becoming fatigued - as thousands have discovered for themselves.

Postum comes in two forms: Instant Postum (in tins) made instantly in the cup by the addition of beding water. Postum Cereal (in packages of larger bulk, for those who prefer to make the drink while the meal is being prepared) made by boiling for 20 minutes. Sold everywhere!
